0.130

Password

CONNECT

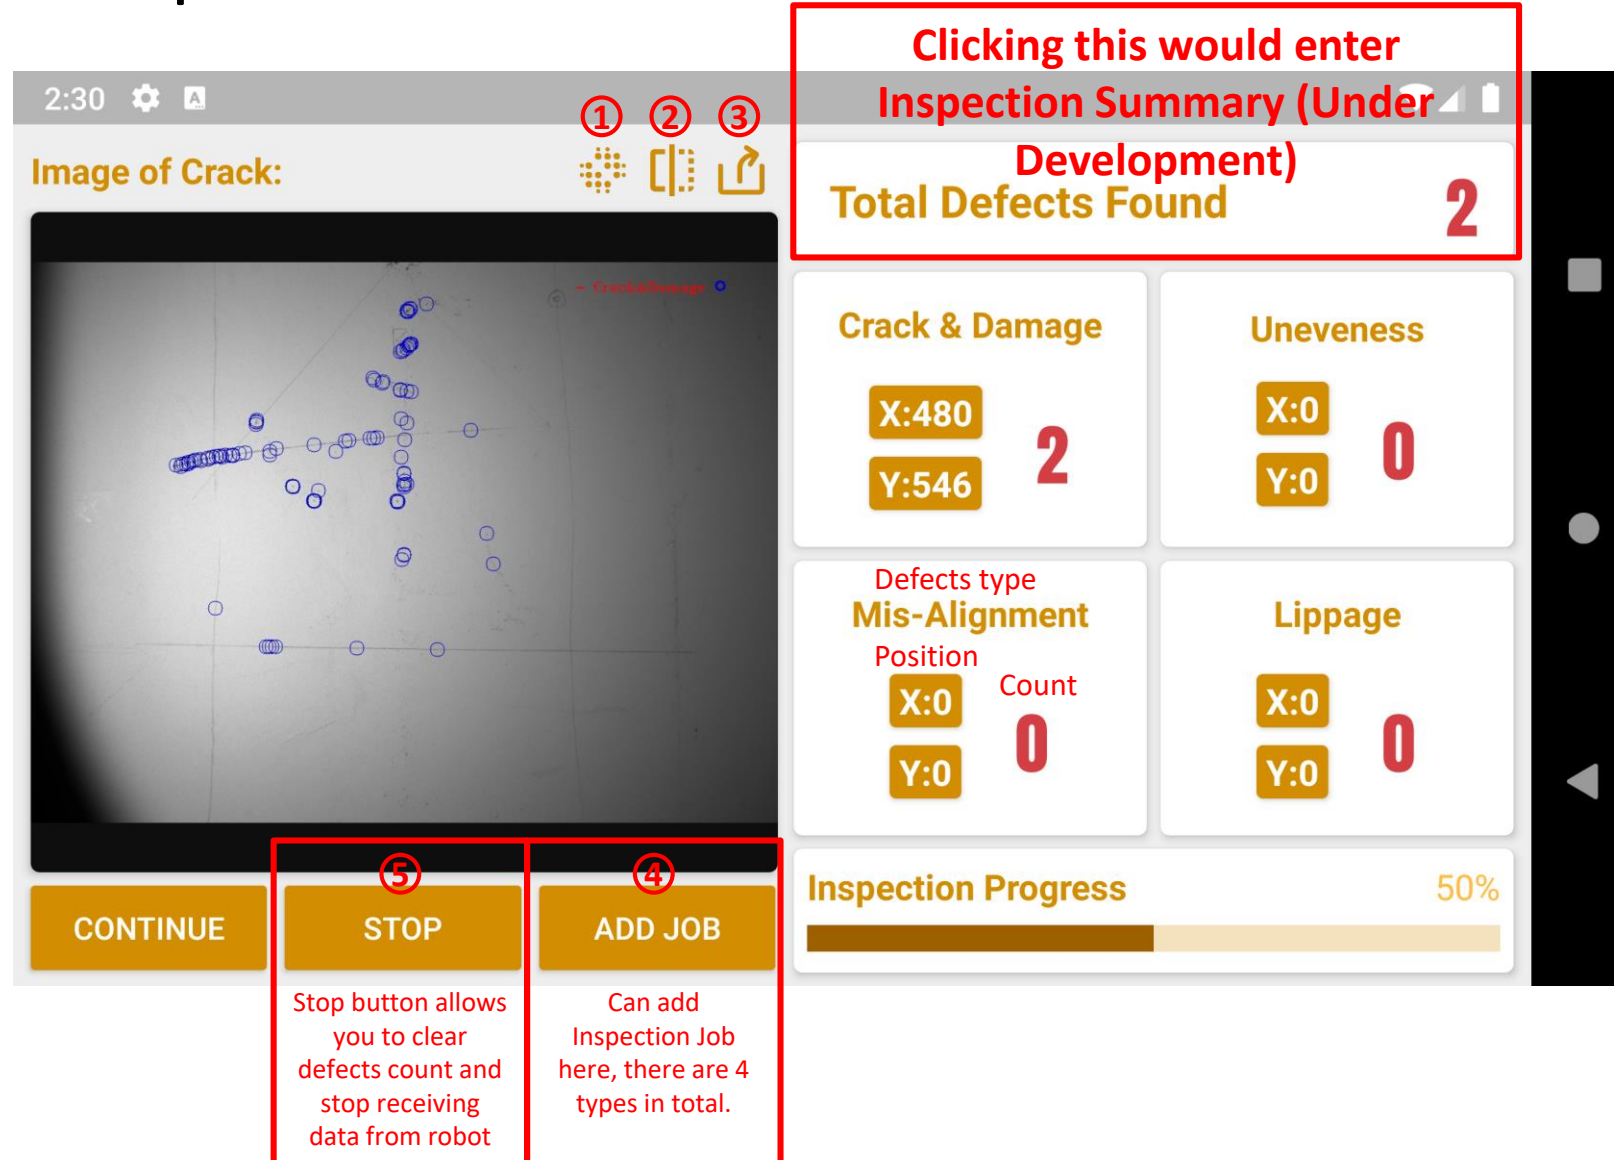

Enter 0.130 when connected to robot Wi-Fi, and
leave password blank

Main Page

1. You can turn off robot when everything is finished
2. Enter inspection mode when necessary
3. Other buttons are not so relevant right now
4. Avoid going back to home as android may kill process.
5. Clicking back button alerts you whether you want to exit the app

Inspection mode

- ① Enter Point Cloud View
- ② Toggle which image you want to show
- ③ Generate report to send to email
- ④ When adding job:

Single: Do a quick scan at current position

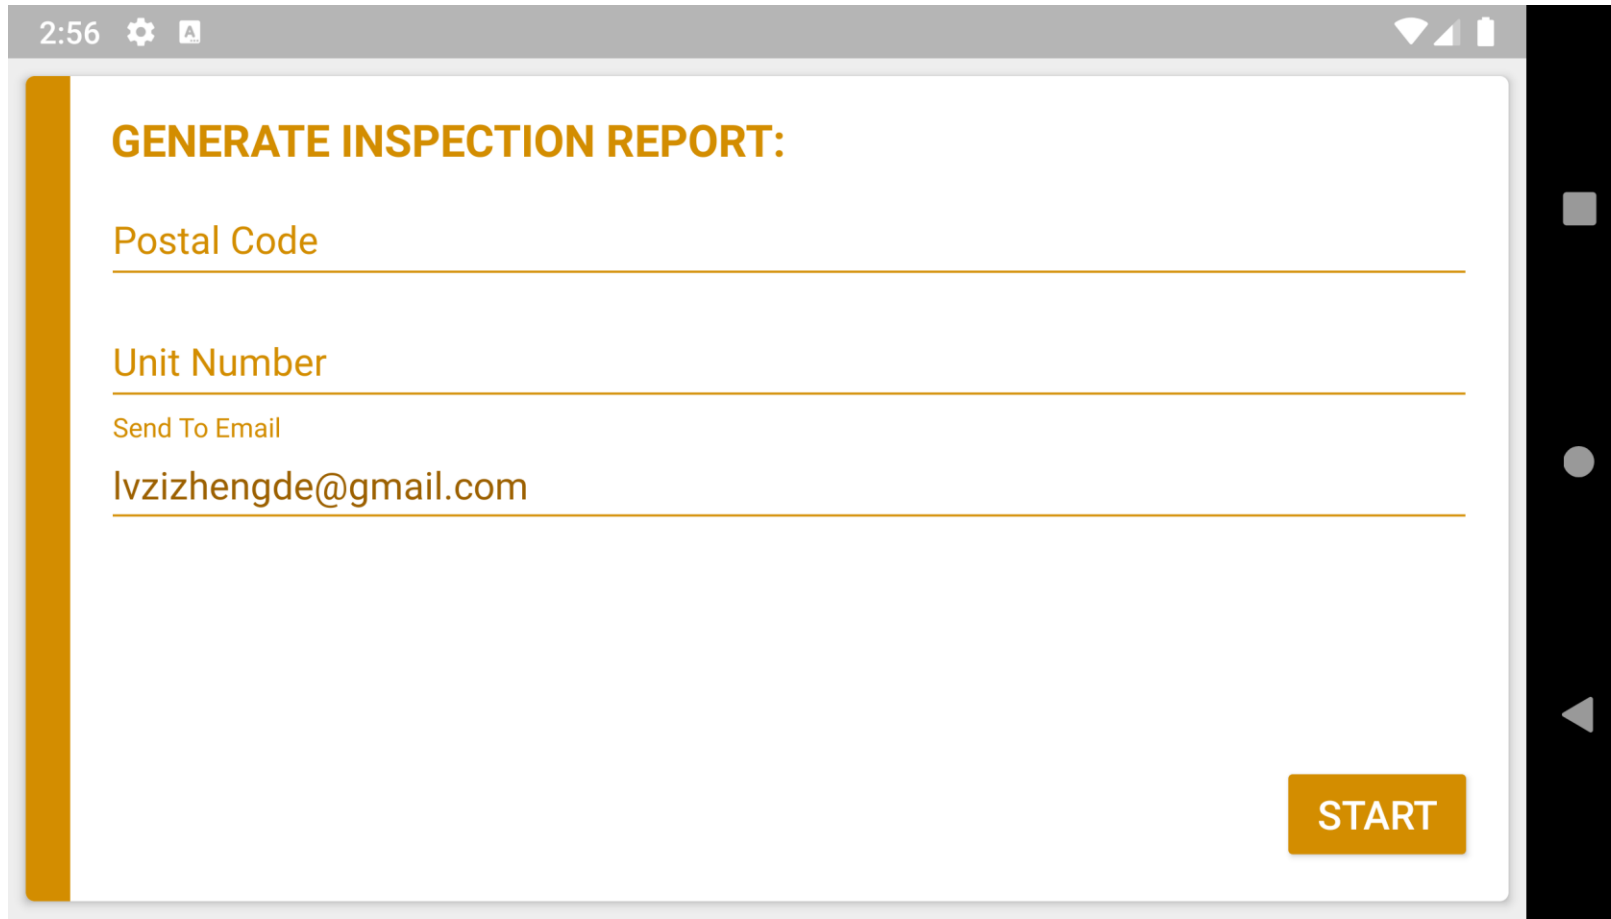

Wall Column: Do a series of column scan.

Auto: Do a series of large area scan in front of you

Floor: Scan the floor around you

- ⑤ Remember to Click stop and don't just click back button as the inspection process would continue in the background

Report Generation

A mobile application interface for generating inspection reports. The screen has a grey status bar at the top showing the time 2:56, a settings gear icon, a location pin icon, and signal/battery indicators. The main content area is white with a thick orange vertical bar on the left. The title 'GENERATE INSPECTION REPORT:' is in bold orange text. Below it are three input fields with orange labels and borders: 'Postal Code', 'Unit Number', and 'Send To Email'. The 'Send To Email' field contains the text 'lvzizhengde@gmail.com'. An orange 'START' button is in the bottom right corner. A black Android navigation bar is at the bottom with a square, circle, and triangle icon.
